SUMMARY

Computer Science student with a 3.99 GPA and an AI Engineering minor, graduating in December 2028. Experience evaluating approximately 50 large language model outputs per month, building Python and Flask applications, designing normalized MySQL databases, and leading small teams in safety-focused, time-sensitive operations.

EDUCATION

Brigham Young University-Idaho | Rexburg, ID — Expected Dec 2028

Bachelor of Science in Computer Science | Minor in AI Engineering | GPA 3.99/4.00

Relevant Coursework Data Science Programming, Computer Systems, Programming with Classes, AI in Software Development, Linear Algebra, SQL, Scientific Computing, Physics I and II

TECHNICAL SKILLS

Languages Python, C#, JavaScript, SQL and MySQL, HTML and CSS

Frameworks and Libraries Flask, .NET, NumPy, Pandas, Matplotlib

Tools and Methods Git, VS Code, Jupyter Notebook, Agile workflow management, object-oriented programming, relational database design, data analysis, LLM evaluation

EXPERIENCE

LLM Quality Assurance Specialist — Feb 2026 - Present

Handshake and DataAnnotation | Remote

- Evaluate approximately 50 LLM outputs per month across STEM domains for factual accuracy, readability, and formatting, providing quality feedback for model improvement.
- Analyze visual reasoning tasks and structured data inputs to identify recurring failure patterns and gaps compared with human performance.

Service Coordinator and Crew Chief — Jul 2022 - Oct 2023

Discount Tire | Fort Collins, CO

- Led daily shop workflow and trained and supervised 3 to 6 service technicians while balancing safety, quality, and time constraints.
- Coordinated service for more than 20 customers per day, communicated status, and maintained customer satisfaction and safety standards.

TECHNICAL PROJECTS

Unit Log | *Python, Flask* | github.com/SMGeyser/UnitLog

- Developing a mobile-friendly application for real-time rental property maintenance tracking, task prioritization, and team coordination.

D&D Relational Entity Repository | *MySQL* | github.com/SMGeyser/itm220/sql_frontend

- Designed and deployed a relational database in third normal form to manage character attributes, equipment inventories, and campaign data.

LEADERSHIP

Full-time Missionary, Zone Leader and District Leader — Oct 2023 - Oct 2025

The Church of Jesus Christ of Latter-day Saints | Sacramento, CA

- Served 9 months as Zone Leader and 8 months as District Leader, mentoring teams in goal setting, planning, and interpersonal problem-solving.
- Reviewed progress in leadership councils, implemented plans across six-week cycles, and launched weekly activities for Marshallese community members.
